

Electronic Student Project

Animal and Plant cell

Across

4. It's the "warehouse" in a cell that stores food and waste products.
6. "Traffic-cop". It selects what enters the cell.
7. Called the "powerhouse of the cell" because it creates energy for the cell.

Down

1. Jelly-like substance within the cell that holds up the other cell parts in the cells.
2. It is the spot of photosynthesis where energy is made for plant cells.
3. Cell brain or the "computer" of the cell. Contains information to make the cell work.
5. It supports and creates the shape of a cell.
